

Justin Johnson

Twilight Solutions
Walnut Creek, California

As founder of Twilight Sounds, Justin Johnson seeks to bring understanding to the somewhat confusing industry of electronic systems contracting.

In today's current marketplace consumers and trades professionals often find themselves left with more questions than they had when they started when seeking information related to technology within the residential and commercial environment. Justin educates his clients and trades professionals on what is important so they can get to the bottom of the rabbit hole and on with their projects.

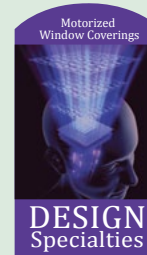

With over 10 years of experience in electronics systems and a degree in communication and women's studies, Justin has honed in on what's really important about these complex systems which is not how they work, but how they can help. He provides his audience with real life examples of problems that can be solved with the use of technology. He demonstrates how lives can become more enjoyable by simplifying processes without having to worry about the bandwidth of a fiber cable or how a macro will eliminate steps to watch a movie.

As an educator in electronics systems Justin seeks to better inform all those who listen so they are able to make smarter decisions when planning how to use technology in their own homes or their client's homes.
